

CLE332 COORDINATOR'S COMMENTS:

Hello all

for our **332nd** Coordinated Listening Event, we were listening exclusively on **EVEN** channels in the frequency range **190 – 530 kHz**.

It was the first time we used these rules for a **CLE** with the frequency range being considerably wider (340 kHz) than normal.

Most of us found propagation conditions over the weekend to be quite good, at least at times which enabled us to log a number of distant stations.

The following table shows how many different signals and countries have been logged by reporters from Europe, North America and Oceania during **CLE332**.

Region	No. of different signals hard	No. of countries logged
Europe	349	53
North America	145	57
Oceania	31	7

This gives a total of **518** different signals from **112** radio-countries including Africa, Asia, Australia, Europe, International Waters, North America and South America!

Although the figures aren't really meaningful after just one run, you'll find our familiar statistical overview here:

		No. of Reporters		Reporters' average km		Reporters' average total km (x1000)		Reporters' average number of NDBs		Reporters' average max. km	
CLE	Date	REU	RWW	REU	RWW	REU	RWW	REU	RWW	REU	RWW
332	Sep. 2026	13	16	1110	1542	193	71	145	44	3533	4747

Interesting fact: Looking at the results of the last 20 CLEs, the “Reporters’ average number of NDBs” this time was by far the highest figure achieved by European reporters.

The following table shows the distance spread for the received signals:

Distance range [km]	No. of signals logged		
	Europe	North America	Oceania
<1000	816	223	9
1000 - 1999	709	261	14
2000 - 2999	242	138	8
3000 - 3999	83	36	
4000 - 4999	23	7	
5000 - 5999	8	2	
6000 - 6999	1	3	
>7000		7	

It shows that this time at least some real DX was possible.

For the first time in quite a while, five stations were logged in North America over a distance of more than 9.000 km!

This time, we'd like to extend a warm welcome to **Giacomo M.** from Italy, who has sent in his first CLE log.

We hope you'll find CLEs just as fascinating as we do and that you'll join in again in the future!

Coming CLEs: (The dates are provisional at present)

CLE333 Fri. October 23rd – Mon. October 26th

CLE334 Fri. November 27th – Mon. November 30th

73

Joachim

(CLE Coordinator)
